

BLOCKWALLS™

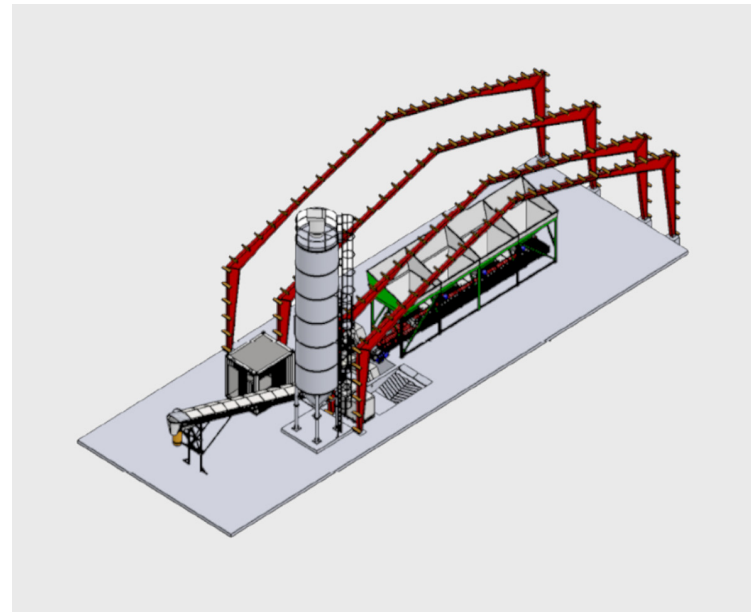

fibo intercon

**UK Fibo Intercon Dealer
Concrete Batching Plants**

Blockwalls entered into partnership with Fibo intercon in first quarter of 2018 as dealers of their equipment in the UK. Blockwalls provides the complete set of solutions to new contractors, builders and construction companies that are seeking to begin or revamp their concrete manufacturing facilities. We sell bespoke batch plants, supplementary components and spare parts exclusively for Fibo machines that are made in Denmark for high quality and precision.

Fibo Intercon is a leading, international manufacturing company with more than 70 years in the industry. This has made Fibo intercom a leading supplier to the global concrete industry. Fibo manufacture and deliver mobile, semi-mobile and stationary concrete batching plants as well as production equipment and complete concrete systems. Only using state-of-the-art technologies and methods to ensure the best quality, efficiency and reliability.

Benefits of purchasing a Fibo batching plant:

- R.O.I 4-8 month
- 15 years guaranteed production
- 3 years of warranty
- Remove support from our service engineer
- Maintain a high reselling value

MOBILE BATCHING PLANTS

Mobile batching plants provides you with excellent flexibility. Mobile batching plants from Fibo intercon are produced in several variants, ensuring that we are always able to cover your specific requirements.

B1200

Mobile batching plant assembled on a joint twin axel bogie trailer with an agitator pan mixer, integrated twin hopper for two types of aggregates, two separate feed belts, water supply, load cells, dosing equipment, and control unit with batching computer.

Capacity: 10-16 m³ / hour Water tank: 250 L
Volume: 1200 L (gross) Load cells: 3 x 2000 kg
800 L (net)

VIKING

This mobile batching plant is assembled on a common twinaxles 13.6 M step frame semi trailer. The standard VIKING is delivered with a large integrated twin hopper for aggregates in the back, pre weighting of cement, water and additives and a smaller twin hopper in the front.

Capacity: 30-60 m³ / hour Water tank: 4000 L
Volume: 2,250 L (gross) Load cells: 3 x 5000 kg
1,500 L (net)

SEMI-MOBILE BATCHING PLANTS

Semi-mobile batching plants from Fibo Intercon can be used for many different purposes, as the capacity of the semi-mobile batching plants cover a wide range from 4-80 m³ / hour. All semi-mobile batching plants are manufactured in a very high quality.

F220

This semi-mobile batching plant on a steel frame is ideal for production of both ordinary concrete and stabilised earth concrete, a capacity of 50-80 m³ / hour is possible.

Capacity: 25-80 m³ / hour Water tank: 500 L
Volume: 2200 L (gross) Load cells: 3 x 5000 kg
1500 L (net)

Mini VIKING

Mini VIKING is the ideal solution for small and medium-sized construction projects: easy to transport, quick to install - and easy to operate. The flexible and reliable plant can with just two types of aggregates mix several different types on concrete. Dosing equipment and control unit with batching computer ensures the optimal concrete quality.

Capacity: 4-5 m³ / hour Water tank: 200 L
Volume: 500 L (gross) Load cells: 3 x 1000 kg
300 L (net)
